We Build Software That Result Business Success

Smart WMS

Warehouse Automation System

We developed a Warehouse Automation System for a Singapore based warehouse which is connected to the multiple robots and sensors. Warehouse operators use this system from product inbound, pallet, location manage, PI, Packing list, and Dispatch management.

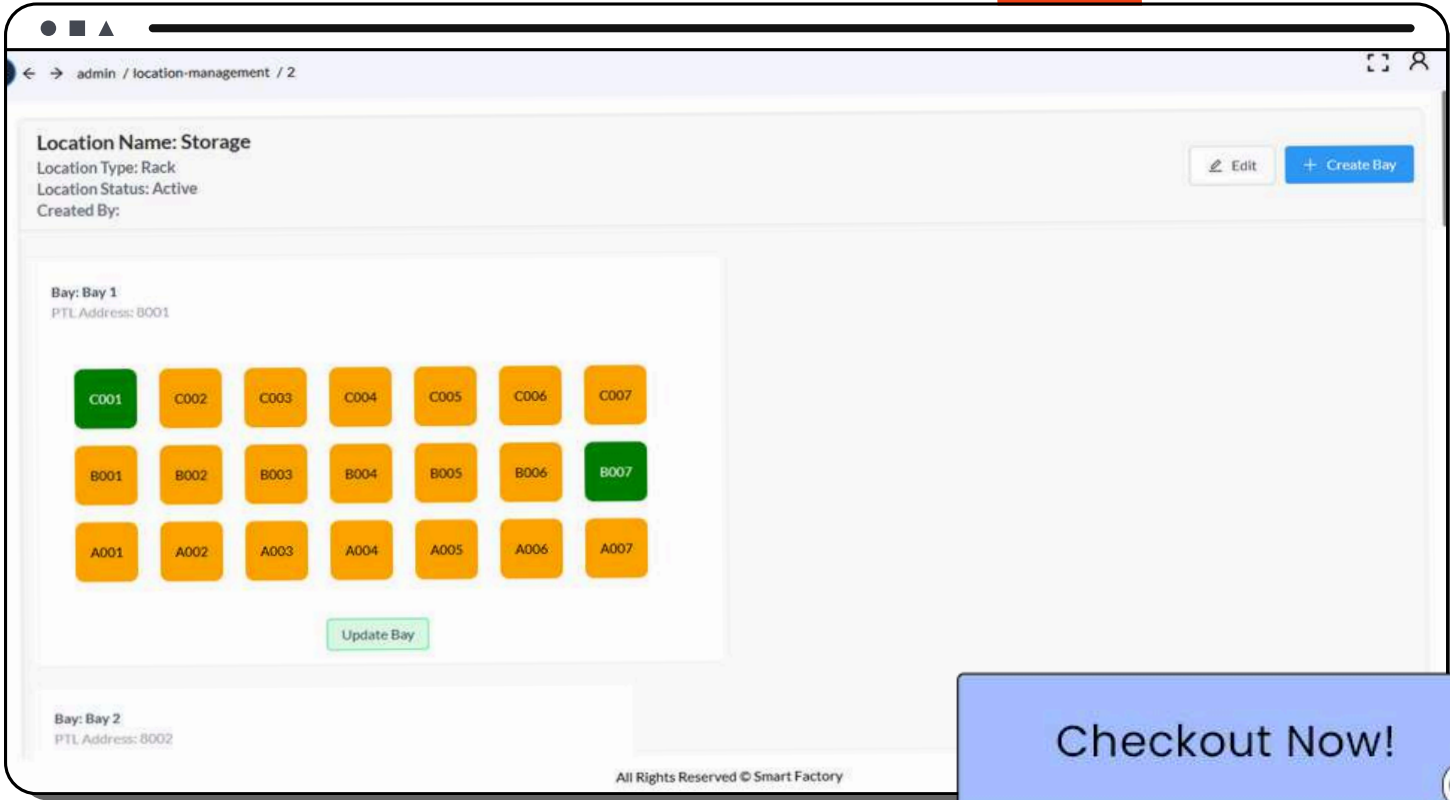

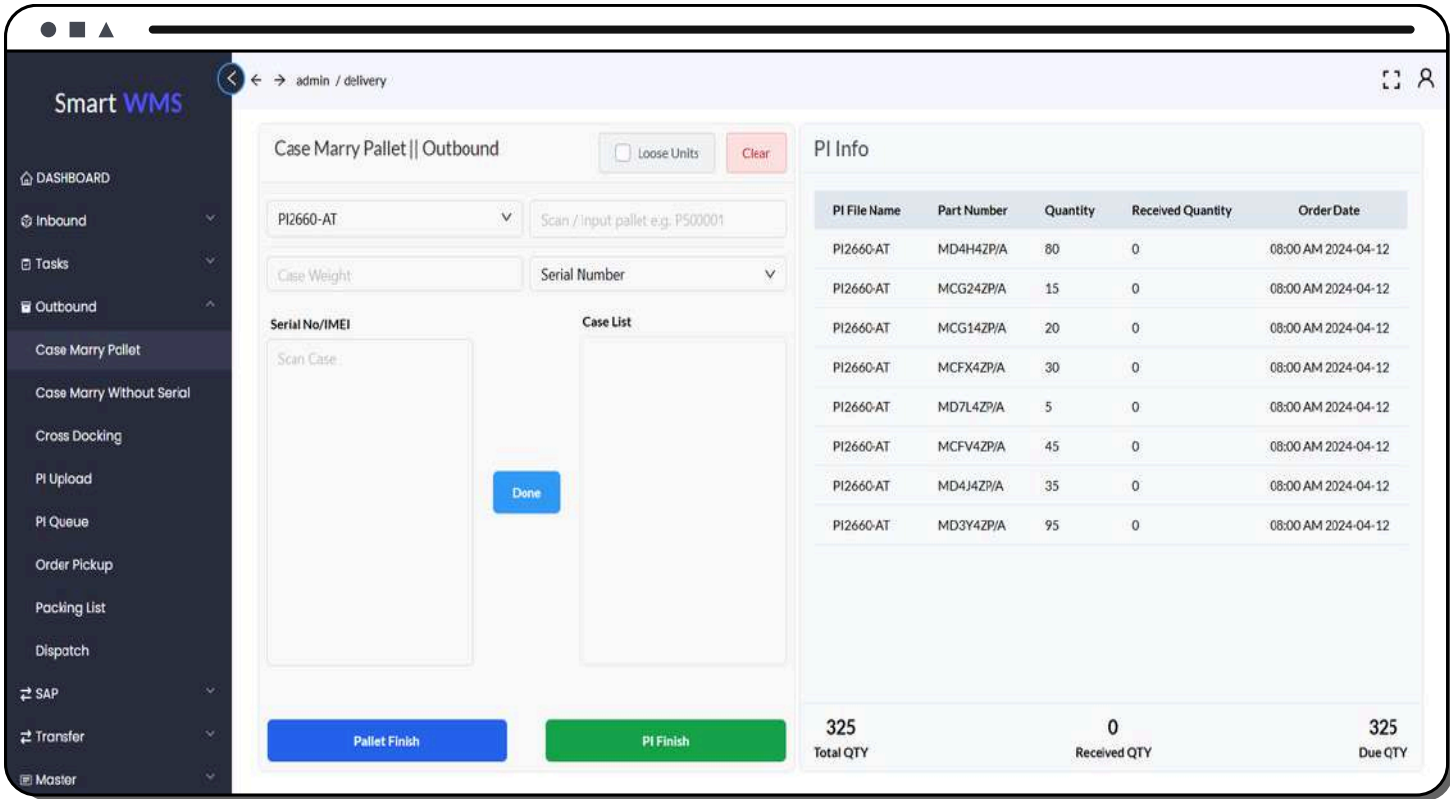

Key Features

- Manages millions of unique IMEI, serial, and part-numbered products.
- Scans thousands of products daily for inbound and outbound activities.
- Provides efficient inventory management using various rules across different locations.
- Generates packing lists and manages order dispatch based on PI (Product Information).
- Facilitates task management for warehouse staff.
