SMART WMS

Smart WMS

Warehouse Automation System

We developed a Warehouse Automation System for a Singapore based warehouse which is connected to the multiple robots and sensors. Warehouse operators use this system from product inbound, pallet, location manage, PI, Packing list, and Dispatch management.

✦ Key Features

- Manages millions of unique IMEI, serial, and part-numbered products.
- Scans thousands of products daily for inbound and outbound activities.
- Provides efficient inventory management using various rules across different locations.
- Generates packing lists and manages order dispatch based on PI (Product Information).
- Facilitates task management for warehouse staff.
