OUR SERVICES
Specializations

We craft your products as if they were our own
Your Success, is Our success

MVP Development
Provides real-world insights into how users interact with the product.

PoC Development
Demonstrates the feasibility of an idea in a practical context.

Enterprise Software
Integrates various business processes into a unified system.

SaaS Application
Accessible from anywhere with an internet connection.

Web Application
Crafted custom web solutions to align with our client's business goals.

Mobile App
A good mobile app increases brand visibility and ease of interaction.

AI Solutions
AI systems analyze data to help businesses make informed decisions.

DevOps & Deployment
Speeds up updates and fixes, helping you respond faster to market demands.

Maintenance & Support
Maintenance protects against vulnerabilities with patches and updates.

You Have Ideas.
We Bring Them to Life.

Requirements Gathering
Understand what the software must do.

System & UI Design
Plan how to build and design the software.

Implementation (Coding)
Build and design the software.

Testing & QA
Ensure the software works as intended.

Deployment & Scaling
Release the software to users.

Maintenance & Support
Keep the software running smoothly & updated.

INDUSTRIES

Gas 369

Gas Cylinder Refuelling and Distribution

Gas369 is a Taiwanese Gas Cylinder Refuelling and Distribution company. We developed their ERP and CRM Software to manage their day-to-day operations, including sales and finance by reverse engineering their existing software that was built 20 years ago.

Key Features

- Purchase of liquid gas from the importer
- Collect used cylinder and refuel them
- Quality check of the cylinder using barcode
- Phone call integration for customer orders
- Bill collection and due management
- Automatic cylinder gas volume detection

Technology used

Laravel | Microsoft SQL Server | React | MySQL

SaaS Accounting Software

Accounting Software Integrated with New Zealand's Bank and Tax Department

We developed highly scalable multi-tenant, multi-database accounting software with ERP features for users in New Zealand, ensuring compliance with GDPR and ISO 27001 standards. We integrated Yodlee and later Akahu for bank statement and account reconciliation.

Key Features

- Inventory management
- Purchase and Sales Module
- Recurring Invoice, Bills and Debit-Credit note
- Auto-manual journal with Chart of accounts
- Bank feed, bank rule and reconciliation
- Fixed Assets and depreciation management
- Contact, Quotation management, Reporting and many more.

Technology used

Laravel | MySQL | redis | aws | Jenkins | DATADOG

Smart WMS

Warehouse Automation System

We developed a Warehouse Automation System for a Singapore based warehouse which is connected to the multiple robots and sensors. Warehouse operators use this system from product inbound, pallet, location manage, PI, Packing list, and Dispatch management.

Key Features

- Handles millions of unique IMEI, serial, and part-numbered products
- Scans thousands of products daily for Inbound and Outbound
- Efficient inventory management with various rules in different locations
- Based on PI, creates packing lists and order dispatch management
- Task management for warehouse staffs

Technology used

Node.js | React | PostgreSQL
AWS | Redis

Coinex Crypto

End-to-End Crypto Wallet & CRM Management Platform

All-in-one crypto CRM platform with client wallet features for deposits, withdrawals, and exchanges. Includes KYC document submission, ticketing support, and admin tools for fee management, user verification, and customer service.

Key Features

- Clients deposit, withdraw, and exchange crypto
- Admins set and manage transaction fees
- Clients upload documents; staff verifies them
- Clients create tickets; staff respond and resolve
- Real-time overview of users and activity.
- Control access with user roles and permissions
- Alerts for transactions, tickets, KYC updates
- Track all actions for security and compliance
